## Work Experience

**Cogent Gas Website**                                        January 2022
- Collaborated directly with client to build a responsive single page website using React, to showcase their business
- Deployed using Heroku

**Tech Blog**                                        November 2021
- Constructed a site using MVC paradigm where developers can publish their blog posts and comment on other developers' posts
- Implemented login and sign up feature that requires users to create an account in order to post comments and access user created posts via dashboard
- Created SQL database to store user, post and comment data

**Spooky Sights**                                        October 2021
- Collaborated with peers to create a Yelp-like application that allows users to search for Haunted locations across America and post reviews if logged in
- Converted raw spreadsheet data for thousands of locations into JSON objects and seeded into SQL database
- Created models within MVC application and used foreign keys to link different models to each other, using Sequalize
- Used Github to push and pull changes, assisting peers when merge conflicts occurred

## Education & Credentials

**University of Toronto -** Remote/Online                September 2021 - November 2021
- Certificate of Completion for the Coding Boot Camp
